

COAL

SERVICES

The Millcreek Mining Group is affiliated with Millcreek Engineering, an integrated engineering company serving the energy and resources industries. We provide support at every stage of project development ranging from geologic and mining consulting services, through to detailed engineering, procurement and construction management (EPCM).

Through our selection of core professionals we bring to your project a team of trusted and respected industry experts. An understanding of our client's needs, coupled with effective management and a streamlined corporate structure, allow us to provide an excellent and highly competitive service to the mining and natural resources sectors.

All of Millcreek Mining Group's professionals have previous careers in both metallurgical and thermal coal. We have worked in every coal region of North America, and in almost all the world's developed and developing coal regions. We have a sound understanding of operating surface and underground coal mines, as well as of developing coal projects.

We can provide the following expertise:

Services

- Coal resource / reserve estimation and certification
- Surface and underground mine planning
- Feasibility studies
- Permitting
- Coal quality
- Fuel supply contracts
- Coal transportation
- Pricing and market studies
- Mine closure and reclamation
- Unconventional coal technologies

For additional details on our coal experience, please request a copy of the resumes of our key personnel.
