

METALS

SERVICES

The Millcreek Mining Group is affiliated with Millcreek Engineering, an integrated engineering company serving the energy and resources industries. We provide support at every stage of project development ranging from geologic and mining consulting services, through to detailed engineering, procurement and construction management (EPCM).

Through our selection of core professionals we bring to your project a team of trusted and respected industry experts. An understanding of our client's needs, coupled with effective management and a streamlined corporate structure, allow us to provide an excellent and highly competitive service to the mining and natural resources sectors.

Our professionals have served as senior management and technical staff at operating metals mines, and have had management, operational and consulting experience in the mining industry. We have worked on a variety of metallic minerals throughout our careers including base, ferrous and precious metals.

We can provide the following services:

Service

- Exploration management
- Core logging and geological / geophysical / geostatistical interpretation
- Geologic resource modelling, estimation
- Hydrological and geotechnical studies
- Operational improvement
- Optimization and benchmarking
- Underground and surface mine planning and design
- Preliminary economic assessments and 'desktop' studies
- Economic feasibility studies
- Materials processing, comminution and handling
- Minerals processing methods including leaching, floatation, SX-EW and calcining.
- Reclamation and closure planning
- Due diligence, asset evaluation
- Private equity and project financing support

For additional details on our hard rock experience, please request a copy of the resumes of our key personnel.
