

MINE CLOSURE

SERVICES

The Millcreek Mining Group is affiliated with Millcreek Engineering, an integrated engineering company serving the energy and resources industries. We provide support at every stage of project development ranging from geologic and mining consulting services, through to detailed engineering, procurement and construction management (EPCM).

Through our selection of core professionals we bring to your project a team of trusted and respected industry experts. An understanding of our client's needs, coupled with effective management and a streamlined corporate structure, allow us to provide an excellent and highly competitive service to the mining and natural resources sectors.

Millcreek Mining Group's professionals have practical, operational and consulting experience in mine closure and reclamation. Our professionals have led successful closure efforts at operating mines, and have supported our clients in optimizing their approach to mine closure. From successful release of bonding obligations through to devising innovative and cost effective solutions to closure problems, we understand that mine closure and reclamation is a fundamental component of a mine's economic life.

The Millcreek Mining Group is supported by Millcreek Engineering, whose professionals provide expertise and experience in bulk materials handling, as well as mechanical, civil, structural, electrical and process engineering. Together, we provide a proven track record of successful mining, engineering and construction projects.

We provide support in closure and reclamation with services including:

Services

- Reclamation and mine closure planning
- Closure cost optimization
- Underground mine seal design
- Fluvial geomorphology ('Natural Regrade') approaches to post-mining surface design
- ML - ARD tailings and waste management
- Cost estimation and scheduling
- Permit and regulatory compliance management
- ARO estimation
- Bond estimation
- Abandoned mine closure
- Contractor selection and management, "owner's engineer"

For additional details on our mine closure and reclamation experience, please request a copy of the resumes of our key personnel.
